**MARKLEY**

# Connectivity Simplified

## Your Global Network Made Easy

With the widening adoption of multi-site, hybrid, multi-cloud, and edge computing, network connectivity and its associated costs are primary factors impacting your entire IT infrastructure and application stack. The design and rollout of truly diverse and redundant circuits are major time sinks, fraught with unwieldy product offerings, complex negotiations, middlemen, and lengthy provisioning delays.

As New England's largest data center provider, telecom carrier hotel, and technology services supplier, Markley is trusted by some of the world's largest companies, technology providers, and research organizations to build scalable, secure infrastructure. Markley delivers high performance and maximum uptime with the region's most diverse and reliable networking ecosystem.

## Markley at your Service

Work with Markley experts to design, implement, and deliver networking solutions specific to your requirements based on the Markley Network, our telecom carrier ecosystem of over 100 domestic and international network providers.

Streamline your networking infrastructure with optimized local and wide-area point-to-point and multi-point access. And with Markley as your single-source supplier, we turn up your circuits, field all your support and service calls, and consolidate invoices into one simple bill direct from Markley.

Minimize the time you spend managing vendors while significantly reducing costs.

## Markley Network Services

A comprehensive suite of services including DIA, Private Line, Wavelength, MPLS, VPLS, and SD-WAN. Available from 100Mb to 100Gb and everything in between, from/to any location, at any distance.

### Choose from across our rich telecom ecosystem
Benefit from competitive pricing from over 100 providers

### Reduce cost and complexity
Employ Markley as your single source network supplier

### Speed your time to value
Let Markley architect and deliver the right solution for you

### Deliver performance at scale
From around the block to around the world

# Reduce the Cost and Complexity of Your Network

Let Markley act as your single service provider for all network services and support, from circuit design and architecture, support request tracking and issue resolution, to simplified billing.

## An open telecom marketplace

As the region's primary telecom facility, the carrier-neutral Markley Network provides an open, competitive marketplace.

## Flexibility and choice

Procure directly from vendors or work exclusively with Markley to design, procure, and support your network infrastructure.

## Designed by Markley experts

Work with Markley architects to design and build your next-gen network, from a single connection to complex multi-regional solutions.

## Objective and transparent

Markley provides pricing from across all our participating carriers to let you decide the right path for your business.

## Consolidated billing

No more complex billing from multiple carriers. Markley consolidates your bill into one simple invoice.

## 24x7x365 support

Get the most from your network with Markley as your single point of contact for all service and support.

## Get Connected with Markley Network Services

### Dedicated Internet Access (DIA)

Enjoy reliable, business-grade Internet access complete with uncontended, symmetric bandwidth. Multiple bandwidth options to match your business needs.

### Ethernet Private Line

Bypass the public Internet with secure, dedicated bandwidth between sites for demanding applications and sensitive data, all while using standard Internet protocols.

### Wavelength

Enable high bandwidth and low latency point-to-point connectivity over a private dense wave division multiplexing (DWDM) network.

### MPLS

Optimize your multi-site network latency and bandwidth usage with Multi-Protocol Label Switching. Securely scale and segment critical application and data traffic.

### VPLS

Securely interconnect your geo-dispersed sites with an Ethernet-based virtual private network, communicating multipoint-to-multipoint over standard IP or MPLS networks.

### SD-WAN

Increase your performance and agility with SD-WAN and hybrid networking solutions. Effectively use both public and private wide-area networking to improve overall service quality.

### Consulting and Design Services

Markley network architects provide full service consulting and design, rightsized to the scope and complexity of your project.

## Solutions for Every Need

Markley provides secure, reliable, and high-performance networking solutions based on offerings from these industry leaders and many others.

ATLANTIC broadband | CAMBRIDGE NETWORK SOLUTIONS | CenturyLink | cogent | colt
