

Markley Achieves VMware Cloud Service Provider Premier Status in the Broadcom Advantage Partner Program

Markley to Help Customers Modernize Infrastructure, Accelerate Innovation, and Improve Business Resiliency with Managed VMware Cloud Foundation Services

May 2024 – [Markley Group](#), a premier provider of mission-critical data center facilities, cloud computing, and network services, today announced that the company has achieved [VMware Cloud Service Provider \(VCSP\)](#) Premier partner status in the Broadcom Advantage Partner Program for North America. This partnership highlights Markley's commitment to delivering innovative hybrid cloud solutions and managed services.

By running VMware Cloud Foundation (VCF) in partner clouds, enterprise customers benefit from a highly efficient cloud operating model that provides the scale and agility of public cloud with the security and performance of private cloud. As a VMware Cloud Provider, Markley delivers sovereign cloud services that support data residency, high levels of compliance, and other important jurisdictional controls.

Premier Cloud Service Provider partners have highly-developed VMware practices and a consistent track record of delivering customer satisfaction. Premier partners are most often regionally focused, with robust sales and service capabilities, competencies, and technical validations for servicing the managed services needs of customers in geographically specific regions.

“Markley’s Infrastructure-as-a-Service offering is a world class, scalable VMware-based infrastructure, providing users with the most popular and proven virtualization technology on the planet,” said Jeff Markley, CEO, Markley Group. “This partnership underscores our commitment to delivering a flexible, secure, and seamless cloud experience to our customers—one that we’ll continue to build on and improve.”

As New England’s largest and longest operating multi-tenant, mission-critical telecommunications and data center facilities, Markley has a proven track record of unparalleled performance and reliability.
